TechLaw Solutions and Nexidia Partner for Audio eDiscovery

Strategic partnership offers cost-effective audio and video processing

Chantilly, VA and Atlanta, GA, May 13, 2008 – TechLaw Solutions, Inc., a leading electronic discovery consulting and services provider, and Nexidia, the developer of the most effective phonetic-based technology for audio search, today announced a strategic partnership designed to help clients more effectively and efficiently review and analyze electronic audio files as part of discovery. The two companies are joining together to incorporate Nexidia’s phonetic audio search technologies with TechLaw Solution’s extensive electronic discovery services to provide clients a complete approach to managing eDiscovery and regulatory compliance matters.

“Audio content is rapidly becoming more of an issue in eDiscovery,” said Mel Goldenberg, President of TechLaw Solutions. “Being able to examine audio files as a natural part of the process, and potentially locate content that could significantly impact the outcome of a case, provides a great advantage to our clients. We are therefore extremely pleased to extend our capabilities by partnering with Nexidia.”

Nexidia’s Audio Discovery OnDemand automatically identifies phoneme (speech) patterns, providing exponentially faster results and higher accuracy than either manual transcription or labor-intensive human listening. This audio search technology, combined with TechLaw Solution’s broad array of services, delivers a defensible process for integrating audio files in complex e-discovery requests.

“Digital voice recording and messaging systems, call center recordings and other audio content is on the rise. Legal professionals need accurate, scalable and cost-effective methods to search and analyze these recordings,” said John Willcutts, president and CEO of Nexidia. “We are pleased that TechLaw Solutions has chosen to partner with Nexidia to meet this growing market demand.”

About TechLaw Solutions

TechLaw Solutions provides time-tested electronic and hardcopy document management services to law firms, corporate legal departments and government agencies for litigation, regulatory, and archival applications. Celebrating its 25th anniversary, TechLaw Solutions is a trusted discovery management partner serving Fortune 100, NLJ 250 and smaller companies as well since 1983. About Nexidia

Nexidia is the market-leading provider of highly scalable audio and video search and review software. Nexidia enables legal professionals to quickly and accurately search, review, and categorize large volumes of audio and video in response to discovery, regulatory, or compliance investigations. Based on years of research and development, Nexidia's phonetic engine is the only technology that allows the user to search on proper names, places, industry terms and jargon without extensive training and cumbersome dictionaries. The process is adaptable to a range of audio analyses and excels across the full spectrum of audio quality. Reducing costs as much as 60% over traditional human listening or transcription methods, Nexidia's eDiscovery OnDemand service is the best option for review and analysis of audio and video evidence. For more information, please visit www.nexidia.com/legal.
