

NEWS RELEASE

United States Department of Justice Purchases Relativity for E-Discovery Review and Legal Hold Process Management

DOJ Chooses kCura's Web-Based E-Discovery Platform, Relativity, Including kCura's First Application for Relativity, Method, which Manages the Legal Hold Process.

Press Release – Chicago, IL, and Washington DC – January 17, 2011 – kCura, developers of the e-discovery review platform Relativity, today announced with TechLaw Solutions that the Environmental and Natural Resources Division (ENRD) of the U.S. Department of Justice (USDOJ) has purchased a license of Relativity, including Relativity Analytics. ENRD has also purchased Method, kCura's legal hold management solution.

Relativity is the flexible, scalable, easy-to-use e-discovery platform for the review, analysis, and production of electronic evidence. Relativity provides flexible workflow capabilities, as well as accelerated review and improved investigative processes through Relativity Analytics, and the identification of conceptually similar documents.

Built in conjunction with several leading law firms, Method is a web-based workflow and notification system that runs on Relativity. It provides a centralized way to efficiently manage legal hold and risk assessment activities. Method's flexible feature set gives users the ability to initiate legal holds, interview custodians to gather information, track and analyze responses, and generate reports to maintain a defensibly-sound audit trail, all through customized and repeatable workflows.

"We're pleased that ENRD has selected the Relativity platform along with Method," said Andrew Sieja, president and CEO of kCura. "We look forward to working closely with their team."

Relativity and Method were purchased through TechLaw Solutions, a pioneer in litigation support and electronic discovery management. TechLaw Solutions manages a GSA contract for government purchase of the Relativity platform.

About kCura

kCura are the developers of the e-discovery software Relativity. Relativity is a web-based platform servicing the analysis, review, and production stages of the EDRM. In addition to document review, Relativity powers kCura's legal hold management solution, Method, which is a workflow and notification system designed to manage legal hold and risk assessment processes. kCura helps corporations, law firms, and government agencies with e-discovery challenges by installing Relativity and Method on-premises, as well as providing hosted, on-demand solutions through a global network of partners in Asia, Australia, Europe, and North America. For more information about Relativity and Method, contact kCura at info@kcura.com or visit www.kcura.com.

About TechLaw Solutions

TechLaw Solutions helps its clients develop and implement strategies to manage electronic and hard copy document collections for litigation, regulatory and archival applications. Since 1983, TechLaw Solutions has

served as a trusted discovery management partner and offers advanced electronic document processing, early case assessment, accelerated content review, and native file review.
