TechLaw Solutions Signs Agreement to Offer Method Legal Hold Application by kCura

Washington DC, and Chicago, IL – February 1, 2011 – [TechLaw Solutions](#), Inc., a leading electronic discovery consulting and services provider, is extending its service offering by incorporating legal hold management software to address another critical component of the discovery process. kCura's [Method](#), built on [Relativity](#), is the tool that has been selected.

“After a careful evaluation of the current tools available, we have determined that Method is very well suited to address the needs we hear being expressed to manage legal hold processes,” said Mel Goldenberg, President of TechLaw Solutions, Inc. “Centralizing the legal hold process with an efficient, web-based application will help our clients effectively address potential business risk in their litigation preparedness efforts.”

TechLaw Solutions will maintain Method along with Relativity at its primary Tier 3 Data Hosting Center. Providing SaaS model access to clients for legal hold management enables more rapid deployment and reduced cost by eliminating the need for costly hardware acquisition.

“TechLaw Solutions continues to be an extremely strong representative of our solutions,” said Andrew Sieja, President and CEO of kCura Corporation. “With increasing attention being paid to legal hold, TechLaw Solutions’ clients will benefit greatly from this new service.”

Using Relativity, TechLaw Solutions provides image and native file review, concept search and clustering, visual data analysis, customized coding options, and flexible workflow capabilities, all delivered in a highly scalable, enterprise-grade solution.

###

About TechLaw Solutions

TechLaw Solutions helps corporations and law firms develop and implement strategies to effectively address litigation preparedness, manage costs, mitigate client risk and provide a competitive advantage in the e-Discovery process. TechLaw Solutions has one of the longest track records in litigation support, working on complex and critical matters since 1983. Service offerings include litigation hold, forensic data collection, advanced electronic document processing, early case assessment, online hosting including foreign language and native file review, as well as hard-copy

information management. Using proprietary tools and techniques together with innovative strategic alliance partners, TechLaw Solutions is uniquely positioned to ensure its customers the best value and most favorable results. About kCura

kCura are the developers of the e-discovery software Relativity. Relativity is a web-based platform servicing the analysis, review, and production stages of the EDRM. In addition to document review, Relativity powers kCura's legal hold management solution, Method, which is a workflow and notification system designed to manage legal hold and risk assessment processes. kCura helps corporations, law firms, and government agencies with e-discovery challenges by installing Relativity and Method on-premises, as well as providing hosted, on-demand solutions through a global network of partners in Asia, Australia, Europe, and North America. For more information about Relativity and Method, contact kCura at info@kcura.com or visit www.kcura.com.
